

**A new world requires a new way
of managing e-communication and security**

A new world requires a new way of managing e-communication and security

Our vision is to provide safety in the digital world – a world that is becoming increasingly more integrated and where information is the most valuable resource. This new world requires a new way of managing e-communication and security.

Nexus works internationally with e-communication and information security solutions. Our clients are companies and organisations for which IT and the Internet are essential to the management of sensitive information and knowledge.

Nexus business concept is to offer solutions, products and services that make the right information available to the right people, at the right time, wherever they need it in the world. We help our clients to not only protect their information, communication and knowledge, but also to create opportunities to make more effective use of these.

Nexus offers a comprehensive portfolio of integrated products with development based on more than 25 years of experience. Nexus is an international company with headquarter in Sweden, offices in several European countries and well-known partners all over the world.

Our offering

Nexus Security Solutions

Nexus offers the market's perhaps broadest and most comprehensive portfolio of integrated security solutions. Product development is based on long experience and deep insight in the demands of the market.

Digital identification and signatures are used to fulfill requirements for the confidentiality, traceability, integrity and availability of information distributed via digital media. At the same time, digital identities and signatures ensure that only the right users have access to the right information. In a world where perimeters are increasingly difficult to define and where security incidents are on the increase, it is all the more important to protect the actual information, not just the hardware.

Nexus Messaging Solutions

For over 25 years Nexus Messaging has provided a complete range of messaging, groupware and workflow products to Enterprise customers all over the world. Nexus Messaging Solutions leverages its unique skills in developing innovative highly scalable and high availability systems perfectly suited for the Enterprise and Service provider markets.

The solutions are designed for companies that consider e-communication critical to their business and demand a stable solution with high availability.

Cloud Services

Using our cloud services will give you full business benefit without any investments in systems or IT maintenance. By using in-house developed products we can offer the highest possible technical support, something which is required for crucial security and e-communication systems.

Our training, service and support

Knowledge implementation

Our deep understanding of technical development, information management and security requirements enables us to offer professional services that cover considerably more than support for our own products.

A few examples are training and support in legislation and technical requirement specifications, implementation processes, project management, risk analysis and policy creation.

Our global and local partner network

Local and international networks

Nexus has a comprehensive partnership program wherein we collaborate with other leading suppliers of solutions, products and services. On an international basis we provide projects together with well-known global and local partners.
