

Basic Deployment of Nexus CM

Get your Certificate Manager system up and running and the system handed over

PROFESSIONAL SERVICES

The service "Basic Deployment of Nexus Certificate Manager" from Nexus Professional Services will get the system installed, configured, verified and handed over to your system administrators.

Service description

Duration:

3 Days

Target group:

System administrators

Expected result:

Server components and administration clients are installed and handed over.

Detailed content:

- The server components are installed in the target environment. The environment must include a suitable SQL database.
- The administration clients are installed on dedicated workstations.
- Basic configuration of the system is conducted.
- A Certificate Authority (CA) is created.
- Procedures for certificate issuance (demo certificate) are created.
- Two officers for the system are created.
- The installed system is tested and verified, including creating, searching and revoking certificates.
- The system is handed over to the system administrator.
